TITLE	The Independent Study Catalog. 7th Edition.
INSTITUTION	National Univ. Continuing Education Association, Washington, DC.; Peterson's Guides, Inc., Princeton, NJ.
ISBN	ISBN-0-7689-0008-5
ISSN	ISSN-0733-6020
PUB DATE	1998-00-00
NOTE	400p.; For the sixth edition, see ED 405 788.
AVAILABLE FROM	Peterson's, 202 Carnegie Center, P.O. Box 2123, Princeton, NJ 08543-2123 ($21.95). Tel: 800-338-3282 (Toll Free); Fax: 609-243-9150. Web site: http://www.petersons.com.
PUB TYPE	Guides - Non-Classroom (055) -- Reference Materials - Directories/Catalogs (132)
EDRS PRICE	MF01/PC16 Plus Postage.
DESCRIPTORS	Continuing Education; Correspondence Schools; *Correspondence Study; Elementary Secondary Education; *Extension Education; *External Degree Programs; Graduate Study; High School Equivalency Programs; Higher Education; Home Study; *Independent Study; Lifelong Learning; Noncredit Courses; Nontraditional Education

ABSTRACT

This directory lists high school, college, and graduate study at-home opportunities, including extensive information about external degree and certificate programs offered by accredited institutions that participate in University Continuing Education Association programs. An introductory section, which explains what independent study is and how it works, is highlighted by profiles of individuals who have traveled this route. Another short section explains how to use the catalog listings. The catalog listings themselves provide short profiles of participating institutions, including cost and whom to contact. Indexes include: (1) geographical; (2) external degree; (3) certificate program; (4) institutions accepting international students; (5) alphabetical guide to subject areas; and (6) subject areas. (CH/EV)

About Peterson's

Peterson's is the country's largest educational information/communications company, providing the academic, consumer, and professional communities with books, software, and online services in support of lifelong education access and career choice. Well-known references include Peterson's annual guides to private schools, summer programs, colleges and universities, graduate and professional programs, financial aid, international study, adult learning, and career guidance. Peterson's Web site at petersons.com is the only comprehensive—and most heavily traveled—education resource on the Internet. The site carries all of Peterson's fully searchable major databases and includes financial aid sources, test-prep help, job postings, direct inquiry and application features, and specially created Virtual Campuses for every accredited academic institution and summer program in the U.S. and Canada that offers in-depth narratives, announcements, and multimedia features.

Members of the University Continuing Education Association (UCEA) include accredited, degree-granting institutions of higher education and comparable nonprofit organizations with a substantial involvement in postsecondary continuing higher education. Through continuing education programs, UCEA members make the resources of their institutions available to youth, adults, volunteer organizations, professional bodies, government, labor, and private business and industry.

INTRODUCTION

WHAT IS INDEPENDENT STUDY?

Independent study, historically called "correspondence study" and more recently "home study" and "distance learning," is individual instruction by mail. Independent study expands the resources of the university classroom, enabling you to learn in your home rather than in a classroom. Because, in most programs, you can enroll at any time and work at home at your own pace, independent study provides a flexible, convenient, and personalized way to study. Assignments are typically completed on a one-to-one basis with a faculty expert who designs the instructional materials, guides your study, and responds to your submitted work.

Courses in This Catalog

This guide catalogs more than 13,000 continuing education courses from 142 accredited colleges and universities. Because much of the material is time sensitive, you should contact the sponsoring institution for the most recent information on courses and subject areas. In many cases, courses may be added to or deleted from a given curriculum between printings of the catalog. This guide includes:

Credit courses offered at every academic level, from elementary school through graduate school. Most courses offered are at the high school and college levels, however. Credit courses that are completed successfully can generally be applied toward a degree. Some colleges and universities offer external degree programs that enable you to earn your degree with a minimal residency or no attendance on campus. (See Index of External Degree Programs on page 281.)

Noncredit courses and courses offered for professional certification. These programs can help you prepare for a new career; acquire specialized knowledge in a concentrated, time-efficient manner; and stay on top of the latest developments in your field. They provide a flexible way for you to study for professional licensure or recertification. (See Index of Certificate Programs on page 285.) In addition, for those who want to learn the subject matter but do not require the credit hours, many high school or college independent study credit courses can be taken on a noncredit basis (if you "audit" a class this way, you are not required to take the exams).

WHAT'S NEW IN INDEPENDENT STUDY?

New and Improved Tools and Teaching Methods

Independent study has been offered by colleges and universities for more than 100 years. However, today's independent study students have access to many more tools—at home and at work—that can enhance the quality of instruction and learning. Given that most homes now have videocassette recorders, many universities include videocassette tape recordings with selected courses. Audiotapes are another popular instructional tool for independent study students who spend significant time commuting. And, of course, computers are popular for such applications as word processing, e-mail, and access to the resources on the World Wide Web. If you do not own a home computer, you may be able to use one where you work or in a local school or library. Similarly, independent study students

JULIE HELM

MANAGING SCHEDULING CONFLICTS

Personal: Age: 21. Single
Home: Washington, Indiana
College/University: University of Missouri–Columbia and Indiana University
Independent Study Courses Taken: Calculus (Indiana) and Introduction to Business Law (Missouri)

Julie was recruited out of high school to play varsity basketball at University of Missouri–Columbia. She is now a junior, majoring in business with an emphasis in marketing. After graduating, Julie hopes to play professional basketball and later pursue a career in sports marketing.

"We have basketball practice scheduled every Tuesday and Thursday from 7:30 to 10:30 a.m. and every Monday, Wednesday, and Friday from 3 to 6 p.m.—plus games. Unfortunately, these times conflict with some of the course prerequisites and requirements for my major. The only way I could continue to play varsity basketball and major in marketing was to attend summer school or take independent study. I chose independent study.

"Last summer I took calculus through Indiana University's Independent Study program and transferred the credits to University of Missouri. Since I was working a summer job, as well as playing scrimmage basketball every night from 7 to 9 p.m., it was difficult. But my boyfriend was taking the same class, so it helped to be able to study together. Though we had to study just about every evening as well as on weekends, it was well worth it. Not only did I get a difficult subject out of the way, I could take it from my home rather than have to attend summer school on campus.

"Back on campus, I found I needed business law as a prerequisite for other classes in my major. My tutor was concerned that I might not learn as much from an independent study course as in a classroom setting, but I've found I actually am learning more. In class you might be tempted to just take notes and not take time to do all the readings, but with independent study, you have to do the readings to complete the assignments. You need to be self-disciplined to keep up—but if you do fall behind, you're allowed nine months to finish a course, so you can make up for it during semester breaks."

11

can often arrange to use fax and photocopy machines. All of these technologies can augment printed materials without compromising the flexibility and accessibility of independent study.

However, independent study should not be confused with electronic distance education programs that deliver courses to off-site students primarily through the use of such technologies as cable and satellite television, computer modem, and videoconferencing. Such telecommunications networks are generally more interactive and require students to work according to a schedule that is in pace with their distance learning classmates and professors' lecture schedules. (If distance education via electronic delivery is what you seek, refer to the Peterson's/UCEA *Guide to Distance Learning Programs* for a detailed catalog of options.)

Enrollments Increasing

New and improved independent study options are attracting many who may have looked askance at correspondence study in the past. Independent study enrollments at four-year accredited colleges and universities have increased by more than 45 percent since 1985. In 1995, enrollments numbered nearly 400,000.

Special Study Opportunities

While the focus of this guide is on individual correspondence courses, related off-campus study opportunities are frequently offered by independent study programs. Independent study offices of the schools listed in this catalog can advise you on the following alternatives:

Tutorial Study. If you have special needs or circumstances, you can arrange for an instructor to teach you a course that is not otherwise offered by correspondence.

Directed Study. This option allows you to substitute special projects or submissions for the assignments usually required in a course.

Group Study. Some courses lend themselves well to group study and serve as an excellent vehicle for a group of friends, coworkers, or other associates who wish to study the same subject. Such group endeavors may involve visits with the instructor or other experts.

Credits for What You Know

Ninety-three percent of the nation's higher education institutions award credit for prior learning if students take examinations to assess their knowledge and skills.

Credit by Examination. If you are already knowledgeable in certain areas, rather than completing prerequisites for an individual course or for degree or certificate programs, you may be able to "test out" of a course by taking and passing its final exam. College and university academic advising can also provide you with information on taking standardized Advanced Placement tests. You can receive degree credit for successful scores on the various tests of the College-Level Examination Program (CLEP, Box 6600, Princeton, New Jersey 08541-6600; 609-771-7865; e-mail: clep@ets.org), the Regents College Examinations, also known as ACT PEP (Test Administration Office, Regents College, 7 Columbia Circle, Albany, New York 12203-5159; 518-464-8500; e-mail: testadm@regents.edu; prior to August 31, 1998, contact ACT PEP, Box 168, Iowa City, Iowa 52243-4014), or the DANTES Subject Standardized tests (military personnel should contact their educational specialist; civilians should contact The Chauncey Group, 664 Rosedale Road, Princeton, New Jersey 08540; 609-720-6500; e-mail: dantes@chauncey.com).

Credits for Life Experience—"Portfolio" Development

To apply for possible award of credit through a college or university for life experience, you should assemble a file or "portfolio" of information about your work and accomplish-

00C 12

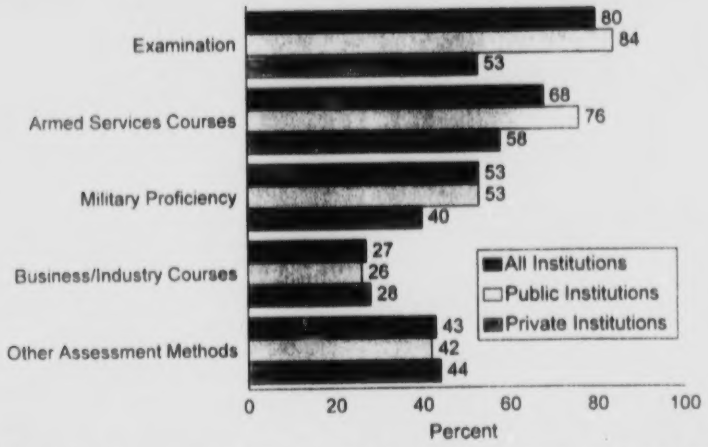
ments (writing samples, awards, taped presentations, copies of speeches) that may have resulted in college-level learning. With academic guidance, you can identify those activities resulting in learning that can be stated as education outcomes or curriculum-relevant "competencies." Your portfolio is then evaluated by an institution's faculty. Information about assessment opportunities for adult learners is available through the Council for Adult and Experiential Learning (CAEL, 243 South Wabash Avenue, #800, Chicago, Illinois 60604).

Credit for Work Training. Since 1974, thousands of employees have been earning college credit for selected educational programs sponsored by businesses, industry, professional associations, labor unions, and government agencies. The American Council on Education's Program on Non-Collegiate Sponsored Instruction (ACE-PONSI, One Dupont Circle, Suite 250, Washington, D.C. 20036) evaluates such programs according to established college-level criteria and recommends college credit for those programs that measure up to these standards.

Credit for Military Training. Your service in the military, specialized training, and occupational experience can potentially earn you college credit. Many military programs have already been evaluated in terms of their equivalency to college credit. The institutions that belong to Servicemembers Opportunities Colleges (SOC) agree to assess students' prior learning and accept each other's credits in transfer. (Contact SOC, One Dupont Circle, Suite 680, Washington, D.C. 20036-1117, 202-667-0079 or 800-368-5622, and ask for *College Degrees Without Classrooms,* flyer #2122.)

Credit for Volunteer Work, Homemaker Skills. You may be able to reap college credit for skills you have learned as a volunteer or homemaker. (Accrediting Women's Competencies, T-154,

Percentage of Institutions That Grant Credit for Learning Acquired in Non-collegiate Settings



Source: Council for Adult and Experiential Learning, *Prior Learning Assessment: Results of a Nationwide Institutional Survey,* 1991.

Educational Testing Service, Princeton, New Jersey 08541 offers information on this.)

WHAT DOES INDEPENDENT STUDY OFFER?

Gain Advanced Standing (Complete Degree Requirements and Prerequisites)

If you'd like to gain advanced standing for college work, need to take prerequisites to change your major, make up work for a course you were unable to complete or failed, or take additional course work to transfer to your current degree program, independent study can provide convenient options. Many people earn and transfer high school or college credit through independent study, but you should confirm first that the institution offering the courses is accredited by the relevant regional or professional agencies. (See page 12 for more details on how this works.) *Note:* If you are taking a course with the intention of transferring credit toward your degree or diploma, it is important to check with the institution to which you wish to transfer credit before enrolling in an independent study course.

Professional Certification

More and more states are mandating continuing education for professionals. For example, real estate brokers are now required to take continuing education in forty-nine states. (In 1981, only seventeen states had this requirement.) In many states, correspondence courses offer a convenient way for individuals to meet professional certification or recertification requirements. Real estate, health care, accounting, and financial analysis are just a few of the many professions that take advantage of the correspondence study method to help their professionals earn and maintain certification. Teachers constitute another major group that relies heavily on correspondence study to meet certification requirements.

Many institutions offer a sequence of correspondence courses in a specific field of a profession. For instance, within the business profession, a certificate in banking and finance and a certificate in marketing are offered by several institutions; within the field of psychology, certificate programs in areas such as psychoanalytic psychotherapy are available.

Other certificate programs provide students with expertise in a new employment specialization and are suitable for those seeking to advance or change careers.

External Degree Programs

External degree programs allow you to complete all degree requirements with minimal or no on-campus attendance. Degree requirements may be fulfilled largely through distance education. Courses may rely on a variety of delivery modes, including correspondence, interactive video, and computer-assisted learning. If you find that you have the discipline and self-motivation that independent study requires, you may decide to pursue your degree this way. This book highlights the numerous accredited external degree programs offered by colleges and universities across the United States. (See page 281 for Index of External Degree Programs.)

Continuing Education Units (CEUs)

If you choose to take a "noncredit" course, you may be able to earn Continuing Education Units (CEUs). The CEU system is a nationally recognized system designed to provide a standardized measure for accumulating, transferring, and recognizing participation in Continuing Education programs. One CEU is defined as 10 contact hours of participation in an organized continuing education experience under responsible sponsorship, capable direction, and qualified instruction. Some schools allow you to

000 14

GRACE OGOSHI-MAHER

BALANCING WORK, EDUCATION, AND FAMILY RESPONSIBILITIES

Personal: Age: 40. Married with four children ages 12, 14, 16, and 18
Home: Walla Walla, Washington
College/University: Washington State University
Academic Accomplishments: After earning an Associate in Arts degree from Walla Walla Community College, Grace completed her bachelor's degree by WSU's external degree program. She took three correspondence courses in Economics, Anthropology, and Food Science Nutrition for Living, plus ten video courses covering anthropology, sociology, and women's studies. Maintaining a 3.8 GPA, she earned her B.A. in social science, Cum Laude, in August 1996. Grace has maintained a 4.0 GPA in the Master in Teaching program and was awarded WSU's Alumni Leadership Award in 1997.

"I am 'sansei' or third-generation Japanese and I work part-time at a community college as the Intercultural Student Advisor in the Office of Multicultural Services. It was important for me to complete my bachelor's degree by extended degree in just one year's time, so that I could enter WSU's Master's in Teaching cohort the following fall.

"The most difficult challenge is to remain focused without burning out. I have been married nineteen years, have 4 children, and also participate in volunteer activities, so juggling multiple responsibilities and finances is always a challenge. It often means declining outwardly attractive offers to pursue a goal that will bring longer term rewards. For example, though we are racking up student loan dollars, we know this is just an 'opportunity cost' that will pay great dividends in the long run.

"I really appreciate that the University offers this external degree program to serve reentry, nontraditional students like me. Competition is stiff for WSU's graduate teaching program, but taking courses via independent study enabled me to perform outstandingly in a short amount of time in order to qualify.

"I now commute some 400 miles each week to attend class on the Tri-Cities campus, but I feel confident that completing my Master in Teaching will help me to help others on their way."

take high school and college independent study courses on a continuing education credit or noncredit basis. (You must take and pass an examination if you wish to receive CEUs.)

WHO TAKES INDEPENDENT STUDY?

Independent study students come from a variety of ethnic, professional, and geographic backgrounds. They study at all types of colleges and universities—large and small as well as private and public.

High school independent study students choose this mode of education for diverse reasons. Sometimes it is a case of an isolated rural family requiring the assistance of a teenager on the home ranch. Also, many adults who lack a high school diploma are reluctant to return to a high school setting and opt to pursue a diploma via independent study. People whose employment obliges them to travel frequently—military personnel, athletes, entertainers—make considerable use of independent study programs. Recently, a growing number of American families have embraced home schooling, and many make extensive use of independent study courses for their children. Among the 324,000 independent study enrollments at fifty UCEA member institutions in the 1995–96 academic year, high school course enrollments represented 43 percent of the total.

More than half of all independent study course enrollments are for college credit. College-level course enrollees include both traditional full-time students and individuals who are employed while pursuing independent study programs. For such students, the opportunity to determine one's own study schedule is a primary attraction. Scheduling problems can constitute a major barrier to study. Employers often find it difficult to release employees for on-campus study. Meanwhile, traditional students—eager to satisfy degree requirements and/or accelerate their pace of study—often discover that independent study is a valuable option that permits them to continue their progress toward a degree when desired courses are unavailable to them on campus.

Scattered throughout this introductory section are profiles of independent study students. These profiles will give you an appreciation of the diversity of students pursuing correspondence study and their varied motives for doing so.

WHY CONSIDER INDEPENDENT STUDY?

Studies show that individuals who continue their education beyond high school earn higher wages than those who do not, and the income gap between the two groups is widening (see graph on page 10). People who want to increase their earning potential are going back to school. Those who want to learn in their own place and at their own pace choose independent study.

As one high school math and science teacher who has both taught and taken correspondence study observed, "When you're doing

JOANNE KARETZKY

ENHANCING PROFESSIONAL CAPABILITIES

Personal: Joanne (age 45) and Stephen (age 51) are married (no children).
Home: Clifton, New Jersey
College/University: California State University, Dominguez Hills
Academic Accomplishments: The Karetzkys both completed 30 hours of correspondence courses to earn Master of Arts in Humanities degrees through CSU's external degree program. Joanne earned hers with an emphasis in art history, Stephen with an emphasis in history.

The Karetzkys both hold positions at Felician College, a private liberal arts college in Lodi, New Jersey. Joanne is the head of technical services; Stephen is the library director. Joanne's thesis, *"The Mustering of Support for World War I by the Ladies Home Journal,"* will be published by Mellen Press in 1998. It focuses on the magazine's graphics and on how the editor used the journal to help gain women's support of World War I.

> *"Although I already held a master's degree in library science, I needed to gain a second master's degree in a specialized subject area to meet academic librarian job requirements. Working full-time, I did not have the time or inclination to sit in a classroom, so I decided to pursue an external degree program. Stephen had already earned both his master's and Ph.D. degrees in library science but decided to enroll in the program to pursue studies in a subject he is passionately interested in—history.*
>
> *"The degree program was excellent and extremely well organized. The packets always arrived on time, and professors sometimes augmented the written materials with audiotapes of lectures they wanted us to hear. I took one class each semester and studied nights and weekends. The program required a lot of reading and research, but I was able to get much of the material through interlibrary loans.*
>
> *"We earned our master's degrees without ever having to travel to campus. All our communication with the professors and advisers was through written correspondence and over the telephone. My adviser was particularly supportive, challenging me to pursue topics I was interested in—but also setting high standards, which motivated me to produce quality work."*

Who Takes Independent Study?

- Foreign service and military personnel and their spouses and dependents stationed in remote locations;
- Students in small or rural area high schools seeking advanced courses;
- Professional entertainers, athletes, and others who hold full-time jobs that require long hours, frequent relocation, or travel;
- Individuals with disabilities and people who are injured or ill;
- Homemakers who care for small children or ailing family members in their homes;
- Single parents with heavy work and family responsibilities who need flexible schedules for their studies;
- Families committed to home schooling and in need of high-quality curricular materials;
- Traditional students seeking advanced placement or a course that is either unavailable on their campus or already "filled";
- People who prefer the flexibility and autonomy of independent study and who are unable to reach campus for various reasons.

correspondence work, you realize you've got to develop good study skills . . . All high school students would benefit from taking a correspondence course. They would be better prepared for college."

If you are currently pursuing an academic degree, independent study can help you:

- Gain advanced standing
- Solve campus scheduling problems
- Take courses that are filled on campus
- Meet course prerequisites
- Explore new subjects or change your major and still graduate on time
- Study while away from campus
- Restore academic eligibility

Independent study courses can help you complete an external degree program. You can earn your high school diploma or college or master's degree from a distance.

If you are contemplating switching careers, taking a correspondence course is an excellent way to determine your aptitude for and interest in a particular subject. The chart below shows the U.S. Bureau of Labor and Statistics predictions for the fastest-growing occupations that require at least a college degree. *The Independent Study Catalog* can guide you to degree programs in these and other areas.

AL LEITER

STUDYING WHILE ON THE ROAD

Personal: Age: 32. Married with two children ages 3 and 1
Home: Plantation, Florida
College/University: Pennsylvania State University
Academic Accomplishments: Al completed his associate degree in letters, arts, and sciences via correspondence courses.

Al Leiter pitched in the 1993 World Series for the championship Toronto Blue Jays and, since then, he joined the Florida Marlins, pitched an 11–0 no-hitter against the Colorado Rockies, was named left-handed pitcher on *The Sporting News* 1996 National League All-Star Team, and, in the 1997 World Series, pitched five innings in the deciding game that won the championship for the Marlins. When his baseball career winds down, Al plans to complete a bachelor's degree at a local college or university, probably majoring in business.

"I'm definitely an advocate of independent learning . . . I highly recommend the program, particularly to young athletes who skipped college to play pro ball.

"I'd try to do one assignment per road trip. In 1992, I took three classes simultaneously, but I wouldn't recommend more than two for anyone with a schedule as hectic as mine. Allocating my time has been the hardest part—balancing work and study and fatherly duties—finding time to do it all.

"Despite the time commitment, my wife Lori has been very supportive. She's a lawyer and definitely a proponent of education. My family was a big factor in my drive to earn a degree. I want to instill these qualities in my children.

"What I like about Penn State's program is that you can earn your degree 100 percent through independent study. That was very attractive to me."

THE IMPORTANCE OF AN ACCREDITED COLLEGE OR UNIVERSITY

The Institutions in This Guide: An Assurance of Quality

Taking a course from an accredited institution is an assurance of quality in terms of the curriculum and the instruction you will receive. Many employers will pay the course fee if an employee successfully completes a course that seems likely to improve job performance. Most organizations will insist, however, that an employee relying on employer-provided tuition assistance pursue studies at an accredited college or university. Moreover, credits earned in the correspondence program of an accredited institution are more likely to be transferable to other accredited institutions (although to be certain, you should check with an academic adviser at the institution to which you intend to transfer the credits before enrolling). This guide includes only those institutions whose independent study programs meet a high standard of quality and accessibility. Institutions are selected on the basis of these criteria:

1. Regional Accreditation. The institution must be accredited by a regional accrediting association, unless special considerations warrant the acceptance of the institution on the basis of accreditation by some other recognized body. The exceptions are described below.

2. Open Access. The institutions in this book offer correspondence study programs that are free of the time and place constraints typical of most other forms of instruction. In general, this means that the institution's correspondence courses are open to students residing anywhere, that the courses do not include any requirements to attend classes, and that credits earned in the correspondence program may be transferred to other regionally accredited institutions.

3. Accreditation and UCEA Membership. One of the principal ways of assuring readers of the quality of institutions in this guide is through their accreditation and their affiliation with the University Continuing Education Association (UCEA). This is the seventh edition of *The Independent Study Catalog*, published jointly by UCEA and Peterson's. Members of UCEA are primarily degree-granting institutions of higher education accredited by one of the six regional accrediting associations[1] or, with the approval of the Board of Directors, by another accrediting agency. In addition, member institutions must have substantial programs in continuing education.

All of the programs and courses of these institutions, including those offered through correspondence instruction, are covered by the accreditation of the institution. With four exceptions,[2] all of the institutions included in this directory are accredited by one of the six regional accrediting associations.

---

[1] The six U.S. regional accrediting associations are the New England Association of Schools and Colleges, Middle States Association of Colleges and Schools, North Central Association of Colleges and Schools, Northwest Association of Schools and Colleges, Southern Association of Colleges and Schools, and Western Association of Schools and Colleges.

In addition to the accreditation of UCEA institutions by these bodies, approval by state educational agencies is conferred separately on some high school correspondence courses offered by UCEA members.

[2] Home Study International (HSI) and Keystone National High School are accredited by the Distance Education and Training Council (formerly called the National Home Study Council), which is the specialized accrediting body for institutions and organizations that have been established primarily to offer programs for home study but is not a regional accrediting association. HSI is also affiliated with Columbia Union College, which is accredited by the Middle States Association of Colleges and Schools. This affiliation is approved by the Middle States Association and the Maryland State Board of Higher Education. Keystone is licensed by Pennsylvania's State Board of Private Licensed Schools, Department of Education, and is a candidate for accreditation by the Commission on Secondary Schools of the Middle States Association.

- Is the pass-fail option acceptable to my college or certifying agency?
- Is credit by examination acceptable?
- Is credit for experiential (life experience) learning available and acceptable?
- Are the external degree programs that some institutions offer by correspondence acceptable to other colleges, employers, and certifying agencies?

IS INDEPENDENT STUDY FOR ME?

Do I Have the Study Skills Required?

Independent study is demanding. Since most learning takes place through written exchanges, it is essential that you have reasonably strong reading and writing skills. And while the flexibility of independent study is one of its biggest advantages, it can also be a hazard. Some people who enroll in independent study courses do not complete them. Being on your own, without the discipline of a traditional classroom, means you need to have good study habits, be able to work independently, and establish and maintain a regular schedule of study. (See Tips for Good Independent Study Habits, page 14.)

You should take the time to evaluate your own approach to studying before you enroll. Assess your study habits and decide, with as much objectivity as possible, how well you think you can study on your own.

In general, students who complete independent study courses believe that they have learned as much as, if not more than, they would have in a traditional course. They often find independent study courses to be more rigorous than classroom courses. If you can take responsibility for your own education, you will find independent study rewarding and satisfying. Before enrolling, consider both the advantages and the drawbacks of the independent study method.

Completing an independent course is not always easy, but the benefits can be significant. In addition to mastering the subject matter, the study skills you develop should enable you to undertake other difficult educational tasks with heightened confidence.

How Do I Communicate With My Instructor?

Many new independent study students worry about how they will deal with material that they do not understand. Some institutions these days achieve student-faculty exchanges using electronic communication (usually e-mail, via computer modem, or fax). Some institutions offer their independent study students access to toll-free "800" numbers so students can talk to their professors or teaching assistants without incurring any long-distance charges. Details about these and other types of electronic communication, including any cost to the student, appear in the institution's catalog or the course description.

The most common way to ask about a problem in a independent study course, however, is by mail. Responses to your instructor's comments on your lessons, requests for clarification of comments, and all other exchanges between you and your instructor will take time. This written interaction with your instructor—whether by computer or by letter—can be very useful. To realize these benefits, however, you must be willing to take the initiative.

HOW DOES IT WORK?

Enrolling in a Course

In general, independent study courses listed in this guide are open to all individuals regardless of age, residence, or educational background. Applications usually are accepted without entrance examinations or proof of prior

UUL 24

EARNING HIGH SCHOOL CREDITS AS A MIGRANT WORKER

FRANCELIA MARTINEZ

Personal: Age: 18

Home: McAllen, Texas. Since she was three years old she has traveled with her family each spring to Hillsboro, North Dakota, and Warden, Washington, in pursuit of farm work.

College/University: University of Texas at Austin

Independent Study Courses Taken: Correspondence courses in U.S. government and economics, on-site grading course in informal geometry, and three Spanish examinations for credit.

Francelia Martinez is a senior at Memorial High School in McAllen, Texas. Next year, she will be the first in her family to enroll in a university. As a migrant worker, she has never completed a school year without interruption. Francelia has maintained a B+ average in college-preparation classes. In addition to her studies and a job as assistant to the migrant clerk, she is president of the Migrant Club and vice president of San Luis Gonzaga Church's Youth Club. In North Dakota, she worked as a volunteer reader for preschoolers. In 1997, she was named UT's Exemplary Migrant Student of the Year. After graduating from high school last spring, Francelia migrated to Hillsboro, North Dakota. This spring she will attend South Texas Community College in McAllen, Texas, and major in business administration. She plans to transfer to the University of Texas–Pan American after her first year.

> *"Every year, something new happens. If it's not having to sleep in our car because we are unable to find a house, then it's the rain, which we pray will stop. I have always entered school late because our work extends into the fall each year.*
>
> *"An education for me is the vehicle that will transport me from the fields of poverty to the successful career of my dreams. UT's courses have helped me by giving me more time to catch up on other high school classes so that I can graduate on time and have more time to work so I can help my family financially."*

educational experience. Enrolling in a correspondence course most often simply involves filling out the registration form (provided by the institution) and paying the tuition and fees listed in the catalog by check, money order, or credit card.

After reviewing the course names in this guide, you can obtain registration forms and catalogs that will provide descriptions of the courses listed in the institution profiles. To obtain these materials, contact the person whose name and address or telephone number appear at the end of each institution's entry in the Institution Profiles and Independent Study Course Listings section of the guide (and see form on page 389). In addition to catalogs, some institutions offer detailed information about individual courses, such as a course outline, upon request. If you have access to the Internet's World Wide Web, you may be able to peruse an institution's course catalogs electronically (see Web address with the institution's contact information).

Time Requirements

Most independent study courses are not bound by traditional academic schedules. You can enroll at your convenience and work at your own pace. An enrollment is valid for a certain period (often twelve months), although most institutions allow you to extend this time. Specific policies and time limitations pertaining to withdrawals, refunds, transfers, and renewal periods can be found in the institutional catalog. Some institutions do have regulations that prohibit you from completing a course too quickly, however. Such policies seek to ensure that students have a valid learning experience and that instructors have the opportunity to respond to work before the final examination. These policies are typically listed in the institutional catalog. Within these broad limits, you determine the time you will take to complete your program of study. Your access to a personal computer and a fax machine can enable you to reduce the time it takes you to complete a course.

Admission to a Degree Program

If you plan to enter a degree program, you should consult the academic advising department of the institution of your choice to learn of entrance requirements and application procedures. You may find it necessary to develop a portfolio of your past experiences and accomplishments that may have resulted in college-level learning (see page 3). A detailed portfolio, properly assessed by an accredited institution, can help award you credits toward your degree.

Transferring Credit

If you wish to apply credit earned through independent study to a college degree or a high school diploma, you should be aware that some institutions may impose certain requirements before they will accept correspondence study credit, and some courses or programs may require previous study or experience. *Note:* If you wish to earn credit for an independent study course and apply it to a program, be certain that it meets the requirements of the institution to which you want to transfer the credit, as well as the requirements of your specific program within that institution.

For example, if you want to earn three credits from College A's Psych 101 correspondence course and apply those credits toward University B's Bachelor of Arts degree, check with University B as well as its department of psychology before you enroll in the course to ascertain whether the credits will be accepted. Most institutions' catalogs will list both the general admission requirements and the prerequisites for individual courses.

Most institutions limit the number and kinds of independent study credits that they will accept. You can usually transfer credit earned

000 26

The Mechanics of Independent Study

While each institution has different policies and procedures, independent study generally follows the pattern outlined below.

1. Study Guide, Textbooks, and Other Materials. Soon after you enroll in a course, you can expect to receive a study guide. The study guide usually includes a list of required textbooks and materials, supplementary information, lecture notes and discussion of course content, specific learning assignments, and all other details necessary for successful completion of the course.

2. Assignments. The study guide divides the course into segments, usually called "lessons" or "assignments." Each lesson is composed of certain study activities, such as readings, self-check exercises, occasional field trips, interviews, and any other activities that are appropriate to the subject.

3. Evaluation by Instructor. Once you complete the activities in each lesson, you usually write an assignment and submit it (mail it or transmit it electronically to the instructor) for evaluation. A written assignment may consist of essay questions, a report, a paper, or other written work. On occasion, you may be asked to submit an audiocassette for answering questions or performing orally. Your assignments are then evaluated by the instructor. Typically, the instructor returns an assignment to you with comments and suggestions as well as a grade.

4. Examinations. Examinations for credit courses are taken under the supervision of an authorized proctor. Generally, it is possible to arrange for supervision of the exam at an institution near your home. In some cases, noncredit courses also require final examinations. The instructor sends the examination forms directly to the proctor, who assumes responsibility for administering the exam and returns it to the institution. You should consult the institution's catalog for more specific information regarding examinations.

5. Records and Transcripts. Institutions maintain records of completed correspondence courses. In the case of credit courses, your grade is recorded, and you can request copies of your transcript showing the credit earned. Generally, you will be charged a small fee for each transcript. For noncredit and certificate courses, some institutions award a certificate of completion or Continuing Education Units (CEUs). In these cases, you will usually receive either a certificate or a statement from the institution showing your CEUs earned.

LYNN BOOTZ

BROADENING CAREER OPTIONS

Personal: Age: 42. Married with three children ages 12, 15, 19
Home: Sterling, Michigan
College/University: Central Michigan University
Independent Study Courses Taken: Completed 32 credits with independent study courses in religion, management, health, geography, and psychology.

Lynn attended CMU in the mid-1970s. After two years of course work, however, she still was uncertain about her major. She decided to drop out of school temporarily and go to work, but soon shifted her priorities after she married and started a family. Twenty years later found Lynn with three kids and employed as an assistant payments worker for Family Independence, a state agency that determines eligibility for families seeking financial assistance.

"I wanted to move up to the position of social service worker, but I needed a college degree for eligibility. I'd already earned 80 credits toward my degree at CMU. It was difficult for me to attend weekend or evening classes since I live an hour and a half from the campus. Independent study enabled me to manage my time around my studies—staying up late and studying after the kids had gone to bed. When I needed instructor assistance or advising, I could call CMU toll-free, and my instructors always responded quickly to any questions I had.

"Don't believe the stereotype that home courses are easier than face-to-face classes. I actually put in more time with the independent study learning packages than I did with on-campus courses, but I also felt I received more one-on-one attention from my professors with this program than I did in a classroom setting."

Lynn also earned 13 credits through CMU's College of Extended Learning prior learning program that offers credit for previous professional and life experience. "I developed a portfolio on my work history for the past twenty years, including training courses and volunteer work. Also, because my oldest son suffers from Attention Deficit Disorder, I have become an expert on the subject and was awarded credit for my work with his doctors and teachers. By the way, he's doing great—he's now a sophomore at CMU."

In May 1996, after two years of classes, Lynn earned her Bachelor of Science degree in community development with an option in community services. A year later she was promoted to a Family Independence Specialist. "The work is challenging, but I'm really enjoying it and feel my career is on the right track."

in a independent study course from one regionally accredited institution to another. As policies and degree requirements of colleges and universities vary markedly, you should consult the appropriate officials at the institution from which you expect to receive a degree to be sure that the credit is transferable. If you pursue course work at an institution that is not regionally accredited, it may be difficult for you to transfer the credit.

Credit for Independent Study

College Credit. Academic credit is measured in semester or quarter hours. You should consult with the institution(s) to which you are transferring credits, because some institutions use different systems of conversion or do not accept partial hours of credit.

High School Credit. Most institutions offering credit for high school courses tailor their credit units to coincide with the method most common in their home state. Generally, courses are offered on the basis of ½ unit of credit (equal to one semester of course work in a regular classroom) or ¼ credit, depending on the state system. Many high schools in remote areas rely on correspondence courses to help their college-bound students meet increasingly rigorous math, science, and foreign language requirements. It is recommended that you obtain prior approval of correspondence courses from your high school to ensure acceptance of credit.

Some institutions in this book offer an accredited high school diploma program. In general, the programs award credit on a semester basis of ½ unit of credit per course.

Enrollment in Credit Courses on a Noncredit Basis. Most UCEA member universities and colleges accept enrollment in credit courses on a noncredit basis and take special interest in students who are studying for personal satisfaction without regard to credit.

The Continuing Education Unit or CEU. The Continuing Education Unit (CEU) is used to recognize participation in noncredit courses. The CEU is defined as 10 contact hours of participation in an organized continuing education experience under responsible sponsorship, capable direction, and qualified instruction. If you are interested in receiving CEUs for noncredit courses listed in this guide, request information from the institutions offering the courses.

Grades and Transcripts for College Courses

Each institution follows its regular grading policies in evaluating the work of independent students. When you complete a course, the institution sends a grade report to you. The grade is also recorded at the institution, and a transcript will be sent to any address you designate in a written request, although most institutions charge for additional transcripts. Some institutions use special designations to indicate courses that have been taken by correspondence.

Course Materials

Course materials always include a study guide, which is usually provided as part of the initial cost. A course may also require workbooks, procedure manuals, lab kits, videotapes or audiotapes, slides, photographs, or other audiovisual materials, which you must purchase separately. The cost of these items varies from institution to institution. In some cases, you may borrow materials from the institution by paying a deposit that is partially refunded when you return the materials. Audiovisual materials, if any, are usually sent with the study guide, and you will be charged as indicated in the institution's catalog. Details about costs for course materials are listed in the institution's catalog or in the study guide.

Textbooks

In most cases, the cost of textbooks is not included in the course fee. Depending upon the particular institution, you may purchase the required textbooks and other course materials in a number of ways. In general, you have three choices: (1) you can order the books at the time of enrollment and the institution will send them to you along with the study guide, (2) you can order books from a designated bookstore after receiving the study guide, or (3) you can obtain the books from local sources. For some courses, the study guide also serves as the text.

The cost of textbooks varies widely, depending upon the number and kinds of texts. The institution's catalog or the course study guide will indicate where textbooks can be obtained and how much they will cost. It may also provide information on the buying and selling of used textbooks.

Postage

In all cases, you bear the cost for postage on the items you mail. Some institutions levy a postage fee for the items they mail to you, such as course materials and returned assignments. Rates for domestic postage are not high, but rates for postage to foreign countries can be a major expense (see Special Considerations for Students in Foreign Countries).

Fax and E-mail Communication

You can register for independent study courses by fax at most institutions listed in this catalog. Also, many schools encourage student-faculty communication by fax and/or e-mail. Independent study catalogs, and even some course learning guides, are frequently available over the Internet and commercial services such as America Online®. Not all schools are equipped to accept lessons via fax or e-mail. Thus, if you want to submit your work electronically, check with the institution regarding its policies on electronic communication before you enroll. You should also be aware that most institutions will not accept exams (which must be administered by an authorized proctor) via fax.

Access to Libraries and Online Research Services

Some universities have made their "digital libraries" available to students learning from a distance. Recognizing that some off-campus students do not have access to computer modems and that local library resources may be limited, some universities offer special library facilitators. For a small fee, the facilitators conduct online and CD-ROM index searches, photocopy articles, and check out and mail books to students. Librarians even arrange for hard-to-find items to be made available through interlibrary loan. You should ask about any special library services available as well as the amount of lead time you should allow for your research before enrolling. This is especially important if you are entering an external degree program.

Special Considerations for Students in Foreign Countries

A special index (beginning on page 288) will direct you to those institutions that accept international enrollments. If you plan to take a correspondence course from overseas, it is wise to enroll before you leave the United States, taking your textbooks and course materials with you to avoid both postage and tariff expenses. If you plan to communicate with your instructor electronically, you should determine university policies for electronic submissions, as well as any technical specifications/modifications you are likely to have to make to your computer and modem equipment. An institution's catalog will identify policies and costs for international enrollments.

Handling and Special Fees

Some institutions charge a handling fee to help them defray the cost of processing materi-

TODD JAMES

ACCELERATING STUDIES TO EARN A DEGREE

Personal: Age: 35. Single
Home: San Antonio, Texas
College/University: Southwest Texas State University
Independent Study Courses Taken: English Reading and Writing, Masterpieces in American Literature

"I'd been a working actor for ten years when the newly formed Northeastern School of the Arts in San Antonio asked me if I'd be interested in heading up their musical theater department. The offer meant that in my first year of teaching, I'd be starting as the head of the department at a great salary. Also, because I'd done some private teaching, the state was willing to waive the requirement that I student teach for a semester for free. Because the high school also encourages its teachers to continue performing, I thought it'd be a great opportunity to give something back to the field without having to put my performing career completely on hold. The only catch was that to qualify to teach full-time, I needed to finish my bachelor's degree. And that meant condensing a year and a half's worth of college credits into a year's time.

"Correspondence study was a real lifesaver. Because I was already carrying a load of 21 credit hours each semester, plus 12 hours in the summer session, there was just no time physically to squeeze in these two English classes—except through independent study. Plus, for a nontraditional student like me, it was perfect in that I could work at my own pace. For example, one of the assignments was A Street Car Named Desire. *As an actor who'd already studied the works of Tennessee Williams, I read it in an hour, whereas in a traditional class, we might have spent a couple of weeks on it—weeks I didn't have. (On the other hand it did take me the whole semester to plow through Hemingway's* The Old Man and the Sea.*)*

"You definitely have to have self-discipline and motivation to complete the work in independent study. The professors and staff were great—really helpful—but they can only give you so much feedback and encouragement in writing and over the phone.

"I completed both classes in just forty-five days. I wouldn't recommend such an accelerated pace for everyone; some of the assignments were so interesting, I wish I'd had time to work at a more leisurely pace. Actually, I had no life outside of studies that year, but it was definitely worth it. I'm really excited to be teaching gifted and talented students and to play a part in shaping the curriculum of a performing arts school while it's still in its infancy."

00. 31

als and registration. In addition, rental fees, usually small, are sometimes charged for special course materials. Special fees are usually charged for course transfers and course extensions and sometimes for enrollment by out-of-state residents.

WHAT ARE MY FINANCING OPTIONS?

The costs of taking a independent study course vary from course to course and from one college or university to another. Each institution sets its own pricing structure. In general, you can expect direct charges for tuition, textbooks, and other necessary course materials and sometimes for postage and handling.

Tuition

Tuition for college and university credit courses is most often figured on the basis of a set amount per credit hour, regardless of whether the institution uses the semester or quarter unit of measurement. (Example: College A offers Accounting 101 for 3 credits and charges $80 per credit. Your tuition for Accounting 101 would therefore be 3 x $80 = $240.) Average tuition rates for a college semester credit hour were $80 at the time this edition was printed.

Average rates for high school courses were $73 per semester hour for the 1996–97 academic year. Noncredit course fees vary widely and change frequently. *Note:* All prices listed in this seventh edition of *The Independent Study Catalog* are based on 1997 pricing and are subject to change. Before enrolling, check the catalog of the institution for its current rates.

Payment Plans

Most institutions require full payment of all charges due at the time of registration. The

Library Support Can Make the Difference—Find Out What's Offered

Library services vary among colleges and universities offering independent study courses. Maryhelen Jones, Director of Off-Campus Library Services at Central Michigan University, recommends you ask the following questions before enrolling in a course or degree program that will require extensive use of library resources.

- Does the school offer you library services directly from its main campus or refer you to libraries in your area?

- What library services are available (e.g., book loans, copies of journal articles, access to electronic databases) either by the institution or libraries in your area or from your home computer?

- Depending on the source of library support the institution offers or directs you to use, will you have to pay for any services (e.g., special fees, copying or borrowing costs, database searching costs)?

- Regardless of how the school handles library services, is there a professional librarian available who can help you with your academic assignments?

UUC 32

preferred method of payment is a check or money order. In a few instances, textbooks are paid for separately. Many institutions accept charge cards, and a few have some form of partial or deferred payment plan. You should consult the institution's catalog to determine payment policies.

Financial Aid

Financial aid is not as readily available for independent study students as it is for "traditional" classroom students. The list below identifies a few possible sources of financial aid. Students who require aid are encouraged to explore all applicable options.

Employers. Many employers provide educational benefits to their employees. These are generally administered through the personnel or benefits department of the organization. If you are a teacher or other public school employee, you may be able to receive reimbursement of fees for courses taken for college credit. Contact the coordinator of staff development within your district for further information.

Unions. Unions often negotiate educational benefits into their contracts. The union's business manager would be the person to provide information.

Veterans' and Military Benefits. All of the federal veterans' assistance acts have had provisions for financial assistance for college and university correspondence study, usually under the term "independent study." The amount and type of assistance varies, and it is best to check with a local Veterans Administration office for specific details. If you are on active duty in the military or a member of the National Guard or Armed Forces Reserve, you have two options available to you for financial assistance. The first consists of "in-service" benefits through the U.S. Department of Veteran Affairs. The second is "tuition assistance," which comes from the military person's respective service and is administered by DANTES (Defense Activity for Non-Traditional Educational Support). In either case, the Educational Service Officer of your base, post, or ship can provide information. In addition to the federal government's tuition assistance plans, some states have educational benefits for veterans and military personnel. Direct your questions and inquiries to the state veterans or military affairs offices.

Other Federal Programs. Although most federal programs that provide grants or loans are directed to the resident student, some are applicable to the independent student as well. Under certain conditions, for example, Pell Grants may be available to a person enrolled in independent study. Because eligibility is limited to degree candidates, you should contact the financial aid office of the institution from which you are seeking your degree.

Vocational Rehabilitation. Nearly all states provide financial benefits for the education of persons with some form of disability. A number of states include correspondence study in the forms of education allowable for benefits. Direct any questions to your state's department of vocational rehabilitation.

Institutional Aid. A small number of colleges and universities have a limited amount of financial aid available for correspondence study. You should carefully examine an institution's catalog for financial aid information or consult its office of financial aid.

HOW TO USE THIS CATALOG

The Independent Study Catalog: A Guide to Over 13,000 Correspondence Courses is just that, a guide to 142 accredited colleges and universities that provide independent study or correspondence instruction in a wide variety of subject areas. There are several ways to use this catalog.

FINDING COURSES

Finding Courses Offered by a Particular Institution

If you have already decided to study through a particular institution listed in this book, simply find the institution's entry in the alphabetical Institution Profiles and Independent Study Course Listings section and review its list of courses.

Each institution entry lists elementary school courses first, if any, followed by high school, college, graduate, and noncredit courses; these five kinds of courses (or levels of study) are discussed on page 26. Under each of these five major levels of study, course names are grouped together according to the academic department that offers them. Next to each course name is the course number, the number of credits earned by its successful completion, and special features. (If the course offers one or more of the five supportive instructional technologies, it may be noted here.) The codes for credits and special features are explained on page 27.

Finding Courses Through the Subject Index

To locate a course in a particular subject, turn to the Alphabetical Guide to Subject Areas Index on page 290. There you'll find an alphabetical listing of hundreds of specific subject areas. The name of a subject is followed by the page number of the location of that subject in the Subject Areas Index that begins on page 297. In the Subject Areas Index you can find the name of each institution offering one or more courses in that area, the name of the department offering the course(s), plus a code letter indicating the level of study at which the course is offered (E=elementary, H=high school, C=college, G=graduate, N=noncredit; see the section, Kinds of Courses on the next page). Browsing up and down the course listings will lead you to related subject areas.

After finding a subject area of interest in the Subject Areas Index, turn directly to the institution's entry in the Institution Profiles and Independent Study Course Listings section, where the institutional names are listed alphabetically and—in dictionary fashion—at the top of the page.

FINDING PROGRAM INFORMATION

Finding Information About an External Degree Program

Some institutions in this book not only offer individual independent study courses for credit but also offer structured degree programs in certain subject areas. To identify schools that offer such programs, turn to the Index of External Degree Programs on page 281.

Finding Information About Certificate Programs

Certificate programs are becoming increasingly available through many institutions and,

000 34

therefore, are now included in this catalog. Turn to page 285, the Index of Certificate Programs, to find out more about the availability of such programs.

This catalog does not and cannot provide all of the information needed to actually enroll in a course. To do that, the prospective student must use the address at the end of an institution's entry to request a copy of the correspondence study catalog and specific information about enrolling. Some institutions offer detailed information about individual courses, such as an outline of the course, which will be sent upon request.

In general, course selection should follow an assessment of the purpose for which the course is intended: (1) for credit to apply toward a degree or diploma; (2) for personal development, without regard to credit; or (3) for certification in a professional program.

Students who expect to apply credit earned through independent study to a degree or a diploma should contact the resident institution for counseling and advice in order to ensure that the credit will be accepted. (See the section Credit for Correspondence Study on page 20).

KINDS OF COURSES

Five kinds of independent study courses are listed in this catalog.

Elementary School Courses. Three institutions (Home Study International, the North Dakota Division of Independent Study, and the University of Arizona) offer independent study courses for the elementary grades.

High School Courses. Courses covering virtually every area of high school study are offered by a number of institutions. A few institutions offer high school diplomas by independent study, but in most cases independent study credit is accepted by the local high school, which issues the diploma. Students should have approval from the diploma-granting institution before enrolling in an independent study course.

College Courses. A great variety of courses offering undergraduate credit are provided at both the lower-division and the upper-division collegiate levels (indicated by the letters *L* and *U*, respectively, in the course listing) of study.

Graduate Courses. Only a few institutions offer courses for graduate credit exclusively, although some offer courses that are applicable toward credit at either the upper-division collegiate or the graduate level. Some institutions do not accept independent study courses as credit toward a graduate degree.

Noncredit Courses. Courses designed to meet the job-related, professional, cultural, or personal needs of individuals who do not desire credit are offered by many of the institutions in this guide. In addition, most courses that are offered for credit can also be taken on a noncredit basis.

In addition to offering single courses, some institutions offer complete programs of courses to meet certification, vocational, or professional needs. Schools offering structured certificate programs are listed in the Geographical Index of Certificate Programs.

In general, vocational courses are not listed in this catalog. Individuals who are interested can secure information about such courses from institutions that are members of the Distance Education and Training Council (DETC) (formerly called the National Home Study Council). The DETC is the accrediting association for private proprietary correspondence schools and publishes the *Directory of Accredited Institutions*. A free copy of this directory can be obtained from the Distance Education and Training Council, 1601 Eighteenth Street, NW, Washington, D.C.

20009. Send the Council a postcard stating your request, with your name, address, and zip code printed clearly on it.

COURSE INFORMATION AND ABBREVIATIONS

All information in the Institution Profiles and Independent Study Course Listings section has been supplied by the institutions themselves in response to a 1997 joint survey from the UCEA and Peterson's. If any part of the usual data does not appear with a course listing, it was not supplied by the college or university, and students are advised to write directly to the institution for further information.

Course Names and Numbers

Wherever possible, course names have been written in full. However, because of space limitations, it has been necessary to shorten long course names. Course numbers have also been included to aid in identifying particular courses. If there is any question about the specific content of a course, students should write directly to the institution offering the course, referring to the department.

Credit Code

The credits earned by successful completion of courses listed in this catalog are indicated by the number of credits, followed, usually, by S or Q to indicate the specific number of semester or quarter credit hours. (Example: 2S = 2 semester hours.) One or more of the following codes may also be used:

QT = Quarter unit
HF = Half unit
1U = One unit
NC = Noncredit
VC = Variable credit

Special Features

If a course offers any of the five supplemental instructional technologies listed below, this is indicated by the corresponding code.

AC = Audiocassette
CI = Computer-aided instruction
LK = Lab kits
SL = Slides
VI = Videocassette

EASTERN WASHINGTON UNIVERSITY

Credit by examination is available. Enrollment on a noncredit basis accepted in credit courses. High school students may enroll in undergraduate courses for credit. Overseas enrollment accepted. Institution offers special arrangements to take courses not listed in this catalog. Minimum period for course completion is four weeks; maximum period for course completion is one year. Credit for prior learning and credit by examination are arranged through the Center for Liberal Studies. Average cost: $75 per quarter hour.

College Courses

Applied Psychology
  Child abuse: recognition and intervention strategies 497 (3Q); U
  Attention deficit/hyperactivity (ADHD) 497 (3Q); U
Art
  Basic design 107 (5Q); L

AC=audiocassette, CI=computer-aided instruction, LK=lab kits, SL=slides, VI=videocassette

Black Studies
- Introduction to Black culture 214 (5Q); L
- African-American history I 215 (5Q); L
- African-American history II 216 (5Q); L

Business
- Accounting principles I ACCT251 (5Q); L
- Accounting principles II ACCT252 (4Q); L
- Personnel management HUMR328 (4Q); U
- Philosophy of vocational education VOED301 (4Q); U
- Organization and administration of cooperative programs VOED474 (4Q); U

Creative Writing
- Creative writing 210 (5Q); L
- Advanced creative writing-short story 397 (5Q); U
- Advanced creative writing-poetry 398 (5Q); U

Education
- Production of instructional games 460 (3Q); U
- Writing learning activity packets 464 (3Q); U
- Lettering techniques and basic calligraphy 465 (3Q); U
- Learning centers (design and production) 467 (3Q); U
- Bulletin boards 497 (3Q); U
- Thematic teaching 497 (4Q); U
- Puppets (design and production) 497 (3Q); U
- Production of three dimensional instructional materials 497 (3Q); U

English
- Introduction to literature 170 (5Q); L
- Literature of the Bible 387 (5Q); U
- American literature to Whitman 430 (5Q); U
- American literature: Twain to Dreiser 431 (5Q); U
- 20th-century American literature 432 (5Q); U

Government
- Modern government in American context 100 (5Q); L

Health Education
- Facts about HIV/AIDS 496 (3Q); U
- Adolescent health issues 496 (3Q); U

History
- Western heritage: origins to the 18th century 105 (5Q); L
- Western heritage: 18th century to the present 106 (5Q); L
- The American experience: a survey 110 (5Q); L
- African-American history I 215 (5Q); L
- African-American history II 216 (5Q); L
- Women in American history 394 (4Q); U
- History and government of the Pacific Northwest 483 (5Q); U

Humanities
- Great world views 270 (5Q); L

Mathematics
- Finite math 200 (5Q); L

Physical Education
- Sport psychology 497 (3Q); U
- Time management 497 (3Q); U

Psychology
- General psychology 100 (5Q); L
- Abnormal psychology 302 (5Q); U

EMBRY-RIDDLE AERONAUTICAL UNIVERSITY

Credit by examination is available. Overseas enrollment accepted. Military personnel may enroll through the DANTES program. Period for course completion is fifteen weeks. The average cost per college credit is $130. Mandatory fees: one-time $20 computer software fee (graduate program), $6 shipping/handling fee.

External Degree Program

Associate degree is offered in aviation, business administration, and professional aeronautics (63 credit hours required). Bachelor's degree is offered in professional aeronautics and management of technical operations (126 credit hours required). Master's degree is offered in aeronautical science (36 credit

0UL 75

hours required). Credit for prior nonacademic learning is granted. Program enrolls a total of 3,900 students; 97 degrees awarded overall in 1996–97 academic year. The external degree program was established in 1980.

College Courses

Aeronautical Science

- Aviation legislation 254 (3S, VI); L
- Flight physiology 357 (3S, VI); U
- Aviation law 405 (3S); U
- Aviation safety 409 (3S, AC); U
- Corporate and business aviation 412 (3S, AC, VI); U

Computer Science

- Introduction to computer programming with BASIC 109 (3S, VI); L

Economics

- Microeconomics 210 (3S, AC); L
- Macroeconomics 211 (3S, AC); L

Humanities

- English composition and literature I 122 (3S); L
- English composition and literature II 142 (3S, VI); L
- Speech 219 (3S, VI); L
- Technical report writing 221 (3S); L

Management Science/Business

- Principles of management 201 (3S); L
- Financial accounting I 210 (3S, AC); L
- Financial accounting II 212 (3S, VI); L
- Marketing 311 (3S, AC); U
- Managerial accounting 312 (3S, VI); U
- Human resources management 314 (3S, AC); U
- Managerial economics 315 (3S, VI); U
- Organizational behavior 317 (3S, VI); U
- Business information systems 320 (3S, CI, VI); U
- Aviation insurance 322 (3S, AC); U
- Transportation principles 331 (3S, AC); U
- Corporate finance I 332 (3S, VI); U
- Business law 390 (3S, VI); U
- Airport management 408 (3S, VI); U
- Management of air cargo 410 (3S, VI); U

Mathematics

- College math for aviation I 111 (3S, VI); L
- College math for aviation II 112 (3S, VI); L
- Statistics with aviation applications 211 (3S, VI); L
- Decision mathematics 320 (3S, VI); U

Physical Sciences

- Explorations in physics 102 (3S, AC); L

Social Science

- Introduction to psychology 220 (3S, VI); L
- Personality development 310 (3S); U

Graduate Courses

Aerospace Science

- The air transportation system 602 (3S, CI, VI)
- Aircraft and spacecraft development 603 (3S, CI, VI)
- Human factors in the aviation/aerospace industry 604 (3S, CI, VI)
- Research methods and statistics 605 (3S, CI, VI)
- Aviation/aerospace communication/control systems 606 (3S, CI, VI)
- Aviation/aerospace accident investigation and safety systems 608 (3S, CI, VI)
- Aviation/aerospace systems safety 611 (3S, CI, VI)
- Aviation/aerospace industrial safety management 612 (3S, CI, VI)
- Airport operations safety 613 (3S, CI, VI)
- Air carrier operations 620 (3S, CI, VI)
- Corporate aviation operations 622 (3S, CI, VI)
- Aviation/aerospace planning systems 636 (3S, CI, VI)
- Integrated logistics support in the aviation/aerospace industry 644 (3S, CI, VI)
- Graduate research project 690 (3S)

Aviation Business Administration

- Management information systems 521 (3S, CI, VI)
- Aviation labor relations 632 (3S, CI, VI)
- Airport management 645 (3S, CI, VI)

INDIANA UNIVERSITY

Enrollment on a noncredit basis accepted in credit courses. High school students may enroll in undergraduate courses for credit. Overseas enrollment accepted. Military personnel may enroll through the DANTES program. Minimum period for course completion is six weeks; maximum period for course completion is two years. The average cost per college credit is $89.45; the average cost per high school credit is $63.45.

External Degree Program

Associate degree is offered in general study (60 credit hours required). Bachelor's degree is offered in general study (120 credit hours required). Credit for prior nonacademic learning is granted. Program enrolls a total of 4,000 students; 71 degrees awarded overall in 1996–97 academic year. The external degree program was established in 1976.

Certificate Program

Program offers courses in labor studies, healthcare accounting, and financial management. Courses are offered for credit. Credit can be applied toward an associate degree, a bachelor's degree, or a professional program.

High School Courses

Art
  Basic art level 1 03A (HF)

AC=audiocassette, CI=computer-aided instruction, LK=lab kits, SL=slides, VI=videocassette

Drawing and storytelling 23A (HF)
Art history and appreciation 31Ha (HF)

Business Education

General business 1st semester 11G (HF)
General business 2nd semester 12G (HF)
Beginning accounting 1st semester 21B (HF)
Beginning accounting 2nd semester 22B (HF)
Beginning shorthand 1st semester 25S (HF)
Beginning data processing 31D (HF)
Business communications 31E (HF)
Business law 31L (HF)
Office procedures 31P (HF)

Consumer and Homemaking Education

Adjustment, marriage, and the family 01F (HF)
Family management 02F (HF)
Beginning food and nutrition 11N (HF)
Beginning child development 31C (HF)
Consumer education 41C (HF)
Housing and interior design 41H (HF)

Distributive Education

General merchandise retailing 31M (HF)
Introduction to marketing 31S (HF)

Driver Education

Introduction to driver's education: classroom phase 01D (HF, VI)

English

Journalism 01J (HF)
Mass media 01M (HF)
Developmental reading 01R (HF)
Basic vocabulary 01V (HF)
Writing for beginners 02W (HF)
Creative writing: fiction 05W (HF)

KANSAS STATE UNIVERSITY

Credit by examination is available. Enrollment on a noncredit basis accepted in credit courses. High school students may enroll in undergraduate courses for credit. Overseas enrollment not accepted. Military personnel may enroll through the DANTES program. Institution offers special arrangements to take courses not listed in this catalog. To enter the external degree program, students must have already earned sixty hours of college credit and have an overall GPA of 2.0. Degree credit hour requirements vary by program. The average cost per college credit is $88. Mandatory fees: $6 library fee per course, variable media fees.

External Degree Program

Bachelor's degree is offered in interdisciplinary social science, and animal science and industry. Master's degree is offered in chemical engineering, civil engineering, engineering management, electrical and computer engineering, software engineering, and agribusiness. Credit for prior nonacademic learning is granted. Campus residency required for Master of Agribusiness students. Program enrolls a total of 240 students; 15 degrees awarded overall in 1996–97 academic year. The external degree program was established in 1974.

Certificate Program

Program offers courses in animal science and industry. Courses are offered for credit. Credit can be applied toward a bachelor's degree.

Graduate Courses

Agronomy
- Range management 501 (3S, VI)

Animal Sciences and Industry
- Food chemistry 501 (3S, VI)
- Problems: food microbiology 661 (2S, VI)
- Meat selection and utilization 671 (2S, VI)
- Quality assurance of food products 695 (3S, VI)
- Food analysis 725 (3S, AC, CI, VI)

Chemical Engineering
- Advanced chemical engineering thermodynamics 815 (3S)
- Engineering materials II 861 (3S)
- Advanced transport phenomena II 867 (3S)

Chemistry
- Safe chemical laboratory practices 601 (1S, VI)

Civil Engineering
- Regional planning engineering 686 (3S)
- Designing with geosynthetics 723 (3S)
- Advanced structural analysis II 733 (3S)
- Advanced R/C theory 743 (3S)
- Water treatment processes 762 (3S)
- Shear strength and slope stability of soils 822 (3S)
- Advanced soil mechanics 828 (3S)

1U=one unit, HF=half unit, NC=noncredit, QT=quarter unit, VC=variable credit

Civil Engineering *(continued)*
  Prestressed concrete design 844 (3S)
  Traffic engineering II 875 (3S)
Computer and Information Sciences
  Parallel programming 625 (3S)
  Software specification 771 (3S)
  Verification and validation 841 (3S)
  MSE project 895 (3S)
Electrical and Computer Engineering
  Power electronics 624 (3S)
  Power system design 685 (3S)
  Advanced systems theory 830 (3S)
  Noise theory 861 (3S)
  Power system stability 881 (3S)
  Power quality 882 (3S)
  Power systems operation/control 885 (3S)
  Distribution system engineering 887 (3S)
General Agriculture
  Food science seminar 500 (1S)
  Food science problems 630 (2S)
Grain Science
  Cereal science 602 (3S, VI)
Industrial and Manufacturing Systems
  Advanced industrial management 605 (3S)
  Occupational safety engineering 610 (3S)
  Industrial ergonomics 623 (3S)
  Work environments 625 (3S)
  Operations research 780 (3S)
  Advanced engineering economy 822 (3S)
  Insdustrial systems analysis 873 (3S)
Industrial Engineering
  Hazardous materials management 612 (2S, VI)
Management
  Industrial and labor relations 530 (3S, VI)

KEYSTONE NATIONAL HIGH SCHOOL

Credit by examination is available. Enrollment on a noncredit basis accepted in credit courses. Overseas enrollment accepted. Institution offers special arrangements to take courses not listed in this catalog. Minimum period for course completion is eight weeks; maximum period for course completion is one year. Through a second division, Keystone National High School has a complete credit make-up/summer school independent study program for grades 5–12. Average cost: $150 per full unit.

External Degree Program

High school diploma/GED is offered in career or college preparation (21 credit hours required). Credit for prior nonacademic learning is granted. Program enrolls a total of 325 students; 10 degrees awarded overall in 1996–97 academic year. The external degree program was established in 1995.

High School Courses

LIFE BIBLE COLLEGE

Overseas enrollment accepted. Maximum period for course completion is sixteen weeks. The average cost per college credit is $65.

External Degree Program

Associate degree is offered in biblical studies (64 credit hours required). Program enrolls a total of 700 students. The external degree program was established in 1994.

College Courses

Bible
- Synoptic gospels 103 (3S); L
- Bible survey 108 (4S); L
- Pentateuch 115 (4S); L
- Hebrew history 201 (3S); L
- Acts 203 (3S); L
- Hebrew prophets 211 (3S); L

Evangelism
- Personal evangelism 103 (3S); L
- International evangelism 207 (3S); L

General Education
- Introduction to Greek and Hebrew 102 (3S, AC); L
- Western civilization 201 (3S); L
- Christian ethics 201 (3S); L
- Introduction to science 204 (3S, AC); L

General Ministries
- Hermeneutics I 101 (3S); L
- Spiritual gifts and ministries 208 (2S); L
- Homiletics 210 (2S); L

Theology
- Systematic theology I 121 (3S); L
- Systematic theology II 125 (3S); L
- Systematic theology III 215 (3S); L
- Systematic theology IV 217 (2S); L

MARYWOOD UNIVERSITY

Credit by examination is available. Overseas enrollment accepted. Military personnel may enroll through the DANTES program. Maximum period for course completion is eight weeks. Extensions are available. Open enrollment: a student may apply and enroll at any time. Rolling registration: a student may open a registration immediately upon completing a prior registration (no semester scheduling). The average cost per college credit is $251. Mandatory fees: $50 registration fee per 3-credit course ($90 per 6+ credit course), $85 for text/materials.

External Degree Program

Bachelor's degree is offered in accounting, business administration/management, business administration/financial planning, and business administration/marketing (126 credit hours required). Credit for prior nonacademic learning is granted. Campus residency required for four courses or twelve credits, completed in 1-week, 2-week, or weekend sessions. Program enrolls a total of 133 students; 3 degrees awarded overall in 1996–97 academic year. The external degree program was established in 1975.

Certificate Program

Program offers courses in comprehensive business skills and office administration. Courses are offered for credit. Credit can be applied toward a bachelor's degree.

College Courses

- Business
  - Computer tools for management 103 (3S); L
  - Principles of marketing 111 (3S); L

PURDUE UNIVERSITY

Enrollment on a noncredit basis accepted in credit courses. Overseas enrollment not accepted. Minimum period for course completion is fifteen weeks; maximum period for course completion is one year. Average cost: varies by school and course.

External Degree Program

Master's degree is offered in engineering (30 credit hours required).

Certificate Program

Program offers courses in hospital sterilization. Courses are offered for noncredit.

College Courses

Restaurant, Hotel, and Institutional Management
- Essentials of nutrition FN303 (3S); L
- Restaurant, hotel and institution organization and management RH212 (3S); L
- Computers in the hospitality industry RH251 (3S); L
- Quantity food production RH291 (2S); L
- Foodservice layout and design RH323 (3S); L
- Purchasing for restaurant, hotels and institutions RH331 (3S); L
- Introduction to tourism RH371 (3S); L

Noncredit Courses

Continuing Engineering Education
- Computer architecture (NC)
- Introduction to geometric dimensioning and tolerancing for manufacturing (NC)
- Heat and mass transfer (NC)
- An introduction to C and C++ programming (NC)
- Using the internet and the world-wide web for competitive advantage (NC)
- Object-oriented programming in C++ for C and C++ programmers (NC)

Entomology
- Turf grass pest management (NC)
- Urban and industrial integrated pest management (NC)
- Pest control technology (NC)
- Food plant pest management (NC)

Health Sciences
- Central service technical training (NC)

1U=one unit, HF=half unit, NC=noncredit, QT=quarter unit, VC=variable credit

Health Sciences *(continued)*

Material management concepts for health care (NC)
Principles of management and supervision for central service (NC)

US DEPARTMENT OF AGRICULTURE GRADUATE SCHOOL–NATIONAL INDEPENDENT STUDY CENTER

Overseas enrollment not accepted. Minimum period for course completion is six months; maximum period for course completion is eight months. The average cost per college credit is $50.

Noncredit Courses

- Accounting
  - Introduction to federal accounting P1EH (NC)
- Business Communications
  - How to write effective letters and memos P1JL (NC)
- English
  - Reading comprehension P1AA (NC)
  - Vocabulary P1AB (NC)
  - Medical vocabulary P1AC (NC)
  - Spelling P1AD (NC)
  - Grammar and punctuation P1AE (NC)
  - English grammar and usage P1JC (NC)

1U=one unit, HF=half unit, NC=noncredit, QT=quarter unit, VC=variable credit

English *(continued)*
- Put it in writing P1JD (NC)
- Writing short informational reports P1JH (NC)
- Writing analytical reports P1JJ (NC)
- Proofreading P1JK (NC)
- Programmed punctuation P1JP (NC)

Financial Planning
- Controlling a unit budget P1EZ (NC)
- Developing a budget for a unit P1JU (NC)

General Office
- Time management P1BD (NC)
- PC literacy P1GQ (NC)
- Dealing with the public P1JB (NC)

Human Resources Management
- Solving performance and conduct problems P1CA (NC)
- Position classification: an introduction P1CB (NC)
- Personnel management for supervisors: classification P1CB (NC)
- Preparation for retirement P1CD (NC)
- Using pay flexibilities P1CE (NC)
- Personnel management for supervisors: planning and describing positions P1CF (NC)
- EEO-its place in the federal government P1CG (NC)
- Personnel procedures for clerks and assistants P1CH (NC)
- Personnel management for supervisors: managing attendance and leave P1CL (NC)
- Basic processing personnel actions P1CP (NC)
- Advanced processing personnel actions P1CQ (NC)
- Calculating service calculation dates P1CT (NC)
- Pay setting for FWS positions P1DJ-1 (NC)
- Pay setting for GS positions P1DJ-2 (NC)
- Qualification standards for GS positions P1DL (NC)
- EEO counseling P1GP (NC)
- Working for the U.S. government: starting off right P1JW (NC)
- Career coach P1KC (NC)

Labor/Personnel Relations and Studies
- Basic labor relations P1KB (NC)

Management
- Introduction to supervision P1BC (NC)
- Effective work delegation P1BG (NC)
- Improving employee performance P1BH (NC)
- Program planning and analysis P1BW (NC)
- Assertive supervision P1BX (NC)
- Speed reading P1JG (NC)
- How to run a small project P1JT (NC)

Mathematical Statistics
- Practical statistics P1EB (NC)

Mathematics
- Math P1AF (NC)
- Metrics P1AG (NC)
- Math refresher P1EC (NC)

INDEXES

GEOGRAPHICAL INDEX

of Institutions

The following index arranges the institutions in this book by the state or province in which the institution is located. Provinces of Canada follow states of the United States of America; states and provinces are arranged in alphabetical order. Correspondence study programs normally are open to all students regardless of their place of residence, although there may be limitations in respect to international study. An Index of Institutions Accepting International Students appears on page 288. Residents of a state may be eligible for lower tuitions from their own state's public institutions. Prospective students should check with the specific institution to verify policies and expenses.

INDEX of External Degree Programs

External degree programs allow a student to complete all degree requirements with little or no attendance on campus. This index provides access to those institutions that offer external degree programs and notes the subject area and level of degrees offered. Provinces of Canada follow states of the United States of America; states and provinces are arranged in alphabetical order. The level of degree programs is coded as: *(H)*=high school diploma; *(A)*=associate degree; *(B)*=bachelor's degree; *(M)*= master's degree; *(D)*=doctoral degree. The listings under the specific institution's profile in the body of this catalog will tell you which particular courses may be available.

Alabama

United States Sports Academy: *sport coaching (M), sport fitness management (M), sport management (M), sports medicine (M)*

California

Bethany College of the Assemblies of God: *addiction studies (B), biblical and theological studies (B), business (A, B), church leadership (B), early child development (A, B), psychology (B), social science (B)*

California State University, Dominguez Hills: *humanities (M)*

LIFE Bible College: *biblical studies (A)*

Colorado

Colorado State University: *business (M), computer science (M), engineering (M)*

Regis University: *accounting (B), adult education (B), banking/finance (B), business administration (B), communication (B), community organization (B), criminal justice (B), education (M), gerontology (B), interdisciplinary studies (B), journalism (B), language and communication (M), organizational development (B), philosophy (B), psychology (B, M), public administration (B), social science (M), women's studies (B)*

University of Southern Colorado: *social science (B)*

Connecticut

Charter Oak State College: *general studies (A, B)*

Florida

Embry-Riddle Aeronautical University: *aeronautical science (M), aviation (A), business administration (A), management of technical operations (B), professional aeronautics (A, B)*

Illinois

Governors State University: *general studies (B)*

Moody Bible Institute: *Bible-theological studies (A, B)*

Western Illinois University: *arts (B)*

Indiana

Ball State University: *general arts (A)*

Indiana University: *general study (A, B)*

Purdue University: *engineering (M)*

Saint Mary-of-the-Woods College: *accounting (B), business administration (B), CIS (B), early childhood education (A), education (B), English (B), general business (A), gerontology (A, B), human resource management (B), human services (B), humanities (A, B), journalism (B), marketing (B), mathematics (B), paralegal studies (A, B), psychology (B), social science (history concentration) (B), theology (B)*

Taylor University, Worldwide Campus: *biblical studies (A), justice administration (A), liberal arts (general studies) (A)*

Iowa

The University of Iowa: *liberal studies (B)*

University of Northern Iowa: *liberal studies (B)*

Upper Iowa University: *accounting (B), business (A, B), human resources management (B), human services (B), liberal arts (A), management (B), marketing (B), public administration (B), social science (B)*

Kansas

Emporia State University: *general studies (B), library and information management (M), physical education (M)*

Kansas State University: *agribusiness (M), animal science and industry (B), chemical engineering (M), civil engineering (M), electrical and computer engineering (M), engineering management (M), interdisciplinary social science (B), software engineering (M)*

Maine

Saint Joseph's College: *business administration (B), health care administration (B), health services administration (M), human services (B), liberal studies (B), long-term care administration (B), management (A), professional arts (B), radiologic science (B), respiratory care (B)*

Maryland

Columbia Union College: *business administration (B), general studies (A, B), psychology (B), religion (B), respiratory care (B), theology (B)*

Home Study International/Griggs University: *high school diploma (H), personal ministries (A), religion (B), theological studies (B)*

University of Maryland University College: *behavioral and social sciences (B), business and management (B), communication (B), English (B), fire science (B), humanities (B)*

Michigan

Central Michigan University: *administration (B)*

Northwood University: *business (A), business management (B)*

Minnesota

Northwestern College: *Bible (A, B), intercultural ministries (B)*

Missouri

Stephens College: *business administration (B), clinical information systems management (M), education (B), English (B), entrepreneurial studies (M), general education (A), health care (B), health information management (B), health science (B), law (B), marketing (M), philosophy (B), psychology (B), rhetoric (B), student-initiated majors (B)*

Nebraska

University of Nebraska–Lincoln: *high school diploma (H)*

Nevada

University of Nevada, Reno: *general studies (B)*

New Jersey

Caldwell College: *accounting (B), art (B), business administration (B), communication arts (B), computer information systems (B), criminal justice (B), English (B), history (B), international business marketing (B), management (B), political science (B), psychology (B), religion (B), social studies (B), sociology (B)*

Thomas Edison State College: *all areas of study (A, B)*

New York

Regents College: *business (A, B), liberal arts (A, B, M), nursing (A, B), technology (A, B)*

Skidmore College: *traditional disciplines/interdisciplinary programs (B)*

State University of New York Empire State College: *business (A, B), business policy (M), community and human services (A, B), fire services (B), labor policy (M), liberal arts (M), social policy (M)*

OC 200

Syracuse University: *arts (M), business administration (B, M), criminal justice (B), liberal arts (A, B), library science (M), nursing (M)*

North Dakota

North Dakota Division of Independent Study: *high school diploma (H)*

Ohio

David N. Myers College: *accounting (A, B), administration (B), arts (A), general business (B), health services management (B), industrial management (B), management (A, B), marketing (A, B), public administration (A, B)*

Ohio University: *applied sciences (A), arts (A), individualized studies (A), science (A), special studies (B)*

The Union Institute: *arts and sciences (B), business (B), clinical psychology (D), criminal justice studies (B), interdisciplinary studies in the arts and sciences (D)*

Oregon

Eastern Oregon University: *liberal studies (B)*

Western Oregon University: *fire services administration (B)*

Pennsylvania

Keystone National High School: *career or college preparation (H)*

Marywood University: *accounting (B), business administration/financial planning (B), business administration/management (B), business administration/marketing (B)*

Pennsylvania State University: *arts (A), business administration (A), dietetic food science management (A), family studies (A), human development (A), letters (A), science (A)*

Rhode Island

Roger Williams University: *business management (B), criminal justice (B), industrial technology (B), public administration (B)*

Salve Regina University: *business (B), human development (M), international relations (M), liberal studies (B), management (M), nursing (B)*

Tennessee

Johnson Bible College: *New Testament (M)*

The University of Memphis: *fire administration/fire protection technology (B)*

Texas

Southwestern Assemblies of God University: *accounting (B), Bible and church ministries (B), business (B), education (B)*

Texas Wesleyan University: *education (M)*

Utah

Brigham Young University: *general studies (B), high school diploma (H)*

Washington Institute for Graduate Studies: *taxation (D, M)*

Weber State University: *clinical laboratory science (B), health administrative services (B), radiologic services (B), respiratory therapy (A, B)*

Washington

University of Washington: *pharmacy (D)*

Washington State University: *social sciences (B)*

West Virginia

The College of West Virginia: *business administration (A, B), environmental studies (B), general studies (A), interdisciplinary studies (B), secretarial science (A), travel (A)*

Wisconsin

University of Wisconsin–Platteville: *business administration (B)*

University of Wisconsin–Superior: *individualized majors (B)*

CANADA

INDEX

# of Certificate Programs

Certificate programs are courses offered to satisfy a state's educational requirement to gain or renew certification to practice a profession or trade. These programs typically can be taken in a shorter period than that required for a degree program. Credit awarded by a certificate program in certain situations may be applied toward degree credit. This index provides access to institutions that offer certificate programs, notes the subject area of the program, and indicates whether or not credit may be applied toward a degree. Credit applicability toward a degree is coded as: *(C)*=credit for some courses may be applied toward degree credit; *(NC)*=noncredit courses only; *(C,NC)*=both degree-credit and noncredit courses are offered, contact the institution for specific information. Provinces of Canada follow states of the United States of America; states and provinces are arranged in alphabetical order. The listings under the specific institution's profile in the body of this catalog will tell you which particular courses may be available.

Alabama

Auburn University: *health-care facility food service (NC)*

United States Sports Academy: *bodybuilding (C), personal training (C), sport coaching (C), sport management (C)*

The University of Alabama: *criminal justice (C)*

California

Bethany College of the Assemblies of God: *addiction studies (C)*

California State University, Sacramento: *operation of drinking water and wastewater facilities (C, NC)*

San Jose State University: *quality design for manufacturing (NC), quality management (NC)*

University of California Extension: *business (C)*

Colorado

Regis University: *licensed professional counselor (C), teacher licensure (C)*

University of Southern Colorado: *paralegal (C, NC), political science (C, NC)*

District of Columbia

US Department of Agriculture Graduate School–Correspondence School: *accounting (C, NC), editing (C, NC), elder law (C, NC), engineering technology (C, NC), library techniques (C, NC), meteorology (C, NC), paralegal (C, NC)*

Florida

University of Florida: *dietary manager (NC), management and supervision (NC), paralegal (NC)*

Georgia

Savannah State University: *child care (NC), paralegal (NC)*

Illinois

Moody Bible Institute: *Bible-theological studies (NC)*

Indiana

Indiana State University: *criminology (C)*

Indiana University: *financial management (C), healthcare accounting (C), labor studies (C)*

Purdue University: *hospital sterilization (NC)*

Saint Mary-of-the-Woods College: *gerontology (C), paralegal studies (C), theology (C)*
Taylor University, Worldwide Campus: *Christian ministries (C), justice and ministries (C)*

Kansas
Kansas State University: *animal science and industry (C)*

Maine
Saint Joseph's College: *American studies (C), business and health care management (C), Christian tradition (C), health care finance (C), long-term care administration (C), medical/dental administration (C), professional studies (C), women's studies (C)*

Maryland
Home Study International/Griggs University: *pastoral ministry (C)*
University of Maryland University College: *criminal justice (C), management (C), paralegal studies (C), public administration (C), state/local government (C)*

Minnesota
Northwestern College: *Bible (C)*

Missouri
Stephens College: *education (C), health information management (C)*

Nebraska
University of Nebraska–Lincoln: *international business (C), real estate (C)*

New Jersey
Thomas Edison State College: *accounting (C), administrative office management (C), computer science (C), finance (C), marketing (C)*

New York
Regents College: *home health care nursing (NC)*
State University of New York College of Environmental Science and Forestry: *geographic information systems (C)*
State University of New York Empire State College: *fire services administration (C)*

North Dakota
University of North Dakota: *dietary management (NC), food service (NC)*

Ohio
David N. Myers College: *health services management (C)*
Ohio University: *business management technology (C)*

Oklahoma
Oklahoma State University: *fire protection (NC)*

Oregon
Western Oregon University: *fire services administration (C)*

Pennsylvania
Delaware Valley College: *computer programming (C), ecological landscape design (C), environmental studies (C), floral business (C), hazardous materials management (C), managing information systems (C), professional writing (C)*
Marywood University: *comprehensive business skills (C), office administration (C)*
Millersville University of Pennsylvania: *employee benefits assistance (NC), healthcare management (NC), law enforcement (NC)*
Pennsylvania State University: *administration of justice (C, NC), adult development and aging (C, NC), business (C, NC), business logistics (C, NC), child services (C, NC), dietary management (C, NC), dietetics (C, NC), human resources (C, NC), marketing (C, NC), nursing management (C, NC), paralegal (C, NC), purchasing (C, NC), small business (C, NC), writing social commentary (C, NC)*

Rhode Island
Salve Regina University: *correctional administration (C), information systems (C), management (C)*

South Dakota
University of South Dakota: *real estate (NC)*

Texas

Sam Houston State University: *real estate and appraisal (NC)*

Texas A&M University–Commerce: *real estate*

Texas Tech University: *early childhood/childcare (NC), home inspection (NC)*

The University of Texas at Austin: *computer-based training (NC), purchasing management (NC)*

Utah

Brigham Young University: *family history (genealogy) (C, NC), organ performance (C, NC)*

Southern Utah University: *computer technology programming (NC)*

Utah Valley State College: *auto trades (C, NC), business (C, NC), electrical (C, NC)*

Washington Institute for Graduate Studies: *taxation (NC)*

Weber State University: *radiologic services, respiratory therapy*

Virginia

Virginia Polytechnic Institute and State University: *engineering (NC)*

Washington

University of Washington: *C programming (C, NC), literary fiction writing (C, NC), project management (C, NC), public health (C, NC), school library media (C, NC), teaching with technology (C, NC)*

West Virginia

The College of West Virginia: *aviation technology (C), diagnostic medical sonography (C), general business management (C), office technology (C), travel (C)*

Wisconsin

University of Wisconsin–Extension: *accounting (C, NC), business (C, NC), general education (C, NC), personnel management (C, NC), purchasing (C, NC), small business (C, NC))*

CANADA

Alberta

Athabasca University: *arts (C), business (C), French (C), information systems (C)*

Newfoundland

Memorial University of Newfoundland: *business (C, NC), criminology (C, NC), library studies (C, NC), municipal administration (C, NC), public administration (C, NC)*

Ontario

University of Windsor: *business administration (C)*

Québec

McGill University: *educational technology (C), second language teaching (C)*

Saskatchewan

University of Saskatchewan: *adult and continuing education (NC), agriculture (NC), health care administration (NC), prairie horticulture (NC), teaching English as a second language (NC)*

INDEX OF INSTITUTIONS

Accepting International Students

Institutions that accept international students in their correspondence study programs are listed below in alphabetical order. Students should contact the specific institutions regarding policies and fees.

Adams State College 30
Arizona State University 30

ALPHABETICAL GUIDE
to Subject Areas Index

Within the *Subject Areas Index* that follows this list, specific subject areas of courses offered are arranged under broader subject headings. The alphabetical list of headings below provides index users an alternative way to locate particular subjects in which they may be interested. Both broader and narrower level headings are interfiled. Page numbers refer to the location of the term within the *Subject Areas Index.*

Accounting 318
Accounting Technology 306
Acoustics 362
Acupuncture and Oriental Medicine 343
Adapted Physical Education 357
Administrative and Secretarial Services 306
Adult and Continuing Teacher Education 326
Adult Education Administration 324
Advertising 319
Aeronautical and Aerospace Engineering Technology 331
African-American Studies 301
African Studies 302
Agricultural Animal Nutrition 298
Agricultural Business and Management 297
Agricultural Business Operations 297
Agricultural Economics 297
Agricultural Engineering 329
Agricultural Mechanization 298
Agricultural Plant Physiology 299
Agriculture/Agricultural Sciences 298
Agronomy 299
Alcohol/Drug Abuse Counseling 343
American Government and Politics 377
American History 375
American Indian Studies 301
American Literature 333

SUBJECT AREAS INDEX

This index provides access to subjects of courses listed in the catalog. Identical majors, departments, or courses offered by different institutions frequently are called by different names. No common program nomenclature exists to which educational institutions adhere. However, the U.S. Department of Education, for its own statistical analyses, has developed a nomenclature and classification system of instructional programs that is finding increasing use by educational institutions and associations. This Classification of Instructional Programs (CIP) provides the basis for this *Subject Areas Index*. In this index, broad subject fields, which appear in bold capital letters, are arranged alphabetically. Under these broad subject fields, in bold, upper-case and lower-case letters, appear specific programs that comprise these subjects. These are arranged alphabetically. Some of these program headings are specific enough to serve as immediate headings for the courses in the catalog. Most courses, however, require a third level of more specific headings to serve as identifiers. This third, most specific level of subject headings (in italics) is arranged alphabetically under relevant program-level headings. The only exception is that that unusual courses that do not fit an established subject heading are indexed at the end of the list under a heading labeled "*....Other.*"

Under specific the appropriate subject heading, each index line consists of three parts: the name of the institution under which the courses are listed in the main body of this catalog; a slash followed by the name of the department in italics; and a code letter in parentheses indicating the academic level of the course. These codes are: (E) = elementary courses; (H) = high school courses; (C) = college courses; (G) = graduate courses; (N) = noncredit courses.

To find the name of a specific course that an institution offers, turn to the listing of the institution in the main body of this catalog (institutions are arranged alphabetically by name), find the appropriate course level of study (elementary, high school, college, graduate, noncredit), and look under the department name (the name in italics that follows the slash mark).

If you want to find a specific subject by name, check the Alphabetical Guide that begins on page 290.
